EDUCATION

B.Sc. in Computer Science and Engineering,
Daffodil International University

2022 – Present

Expected Graduation: December 2025

COMPETITIVE PROGRAMMING

- Actively compete in Codeforces contests
- Codeforces Max Rating: 990 | Active Contestant
- DIU Take-Off Contest 2022 Final Round
- Unlock the Algorithm Fall-23 Final Round
- Strong foundation in Data Structures, Algorithms, and Problem Solving.

ACHIEVEMENTS & LEADERSHIP

- **Co-Founder and Technical Architect at Bitstream:** Led a 3-member team in designing and deploying the scalable full-stack application, **UniRide**.
- Built 3 production-ready apps.
- (Mendeley Data, DOI: 10.17632/mdtpp2cmj.1, 2024).
- ICPC Asia Dhaka Regional Contest 2024—Preliminary Round Participant.

PUBLICATIONS

Mendeley Data

01/10/2024

Published dataset for ML-based plant disease detection.

DOI: 10.17632/mdtpp2cmj.1 | Platform: Mendeley Data

INVOLVEMENT

Member, DIU Computer Programming Club

Daffodil International University (2022–Present)

LANGUAGES

Bengali | English

TECHNICAL SKILLS

- **Mobile Development:** Flutter
- **Web Development:** HTML, CSS, JavaScript, Flask
- **Databases/Backend:** Firebase (Core), MySQL, Supabase (WebSockets/RLS)
- **Languages:** C, Python, JavaScript
- **Tools & Platforms:** Git, Android Studio, VS Code, Vercel (CI/CD), Cloudinary, Firebase Cloud Messaging (FCM)

PROJECTS

UniRide, Flutter, Supabase, Firebase

[Source-Code [↗](#)], [WebSite [↗](#)]

- Optimized Data Layer with caching, reducing Firebase reads by **60%** and achieving a **sub-3-second app launch time**.
- Engineered secure, real-time matching via **Supabase WebSockets/RLS**, maintaining **<500 ms latency** and **<50 ms average query speeds**.
- eliminating race conditions and achieving a **70% reduction in redundant queries**.

DIURecycle, Flutter, Cloudinary, Geolocation

[Source-Code [↗](#)], [WebSite [↗](#)]

- Engineered a full-stack solution (Flutter/Firebase); utilized Cloudinary and compression to achieve a **70% bandwidth reduction** on media uploads.
- Optimized discovery interface using **Reactive Streams** and paginated queries to minimize data usage and deliver **<1 second chat latency**.
- Implemented all core features, including secure authentications and **Geolocation APIs for mapping**.

ClassSync, React.js, Firebase, Vercel CI/CD

[Live Link [↗](#)] [Source-Code [↗](#)]

- Architected and deployed a scalable PWA to serve **20,000+ users** and support **1,000+ concurrent users** with **<2 second page load time**.
- Secured application via **Role-Based Access Control (RBAC)** and managed Vercel CI/CD, ensuring **99.9% production uptime**.
- Achieving **<500 ms data synchronization** and scoring **90+ on Google Lighthouse**.
